## GUESTS OF NATURE

"In Peschici you can discover the world"

Peschici is a unique place worldwide that always has a sacred character without ever losing its unique miracle of history.

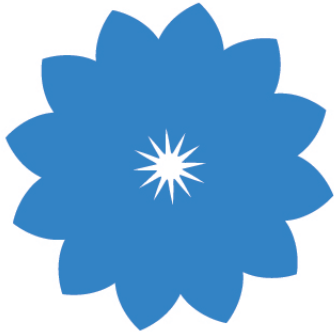

Peschici, for its strategic location, is the ideal point of departure (and arrival) to know and appreciate the natural beauty of the promontory of Gargano. Old as the city is the gastronomic traditions and crafts, which, combined with the familiarity of the locals will make you feel at home.

Peschici is a village in the Gargano National Park, located on the northern tip, overlooking the coast from Rodi towards Mattinata. Looking at the horizon it's possible to see the Isole Tremiti. In recent years has emerged as a popular holiday resort for the quality of its beaches and excellent swimming, which led to boast of the award of Blue Flag.

The old town extends from the marina up to the fortifications of the castle. The morphology of the country is characterized by narrow streets, hidden squares, courtyards, winding stairways, narrow passages, arches and white houses, typical of the beautiful and romantic architecture of the Apulian coast.

The coast is divided into a crescendo of high, jagged, drawing beautiful bays punctuated only by the typical vegetation of "Gargano" peeping between cliffs and coves. The crystal clear sea, by the particular color of emerald, invites you to dive and explore the rich waters; perfect setting for a relaxing swim or, for lovers, an ecstatic for diving.

### A long summer

On Gargano summer is very long because its coast, the summer days, those in which the temperature exceeds 25 ° C during the day, starting as early as mid-May and ends in late September.

Peschici has something more: in July or August when the sun shines, as if you were in Africa, you can enjoy a cool refuge in the shade of fragrant pine trees and along a few kilometers, the plateau at 600 or 800 meters, immerse in cool forests of oak and beech.

### On the streets of the Angel: Route of solitude

For its forests (Foresta Umbra) of holm oak (seat of the oracles of Jupiter), for its gorges, locked in dark caves (sacred places of Calcante) for its caves, which emit icy water, devoted to Homer doctor Podalirius; for the expulsion of the old demons in the Christian Middle Ages, at the hands of the Archangel Michael, the icon of Black Madonnas and saints, Byzantine saints, itinerant monks and hermits cave to cave, from mountain to mountain, until Gargano make a Sacred Mountain.
